## (54) FORMALDEHYDE CAPTURING DECORATIVE LAMINATED SHEET

(57)Abstract:

**PROBLEM TO BE SOLVED:** To impart pliability without employing a plasticizer for a base sheet by forming a formaldehyde capturing layer on the surface and/or rear surface of a laminated body provided with a decoration treated layer and protection sheet on one surface of a base sheet consisting of olefinic resin.

**SOLUTION:** A formaldehyde capturing decoration laminated sheet 1 is formed by providing a lamination treated layer 3 consisting of an entirely inked layer 3a and patterned layer 3b on the upper surface of a base sheet 2, and laminating a formaldehyde capturing layer 5 and primer layer 6 on the lower surface of the base sheet 2 having a surface protection layer 4 laminated thereon. The base sheet 2 is formed of olefinic resin, and it includes exemplarily a polyethylene, ethylene/propylene copolymer, or the like. The formaldehyde capturing layer 5 is formed by applying on the base sheet 2 application liquid with an organic amino compound or the like having a formaldehyde capturing effect kneaded in a solvent type vehicle such as a pyroxyline/alkyd system.
